

COMFORT

LINE

Four collections of thermo-active underwear: COMFORT COTTON and COMFORT WOOL, sleepwear COMFORT NIGHT and leisure wear - FUSION. They are all made of superior natural materials - top-tier cotton, finest merino wool and cellulose microfibers offer even more comfort owing to our unique seamless technology.

Brubeck's double layer, seamless knitwear has great qualities which you won't find in any other everyday underwear. Softness, effective moisture absorption and unique durability will make you feel comfortable all year long.

FUSION

COLLECTIONS

FUSION second layer long-sleeve jerseys offer modern look in a casual, sports style. They will be best as the second layer of clothing which serves its function during everyday activities or moderate sports effort. The collection's signature style and dynamic look achieved through a combination of multi-colour yarns is now enriched with a new functional aspects:

*RIB side zones along the waste to ensure optimal fit,

* lose-fit chimney collar helps to retain heat.

Thanks to its unique composition and double-layer structure, the knitwear used in the FUSION collection transfers the natural moisture perfectly, dries very quickly and ensures optimal thermal comfort. This combination of quality and style will inspire your active day.

WOOL COLLECTIONS

BRUBECK WOOL collections have been created especially for active nature lovers, those who appreciate the closeness of nature. To provide optimal protection and comfort of use throughout the year, during various activities, we use the best raw material created by nature itself - Australian Merino's wool.

Its superfine Wool - with a 16.5-micron fibre thickness - is the basis for T-shirts, blouses and underwear from the COMFORT WOOL, ACTIVE WOOL to EXTREME WOOL lines. We enriched the natural functionality of merino wool and created an extraordinary combination of wool fibres and functional microfibres.

ACTIVE LINE

Thermo-active sport and outdoor clothing for various activities in every season of the year. Our THERMO and EXTREME WOOL collection will keep you safe from cold and wind in winter. Between seasons, reach for the multi-functional DRY set or the ACTIVE COOL outdoor collections made of merino wool. In the summer, it's worth trying out 3DPRO advanced technology next to skin layer, or if you prefer universality and functionality, choose the ATHLETIC line.

Check out our collections designed for particular sports: BICYCLE for the cyclists, MOTORCYCLE for those who prefer higher speeds and FITNESS for the active ones. We will keep up with your activity no matter how intense it is or what the weather conditions are.

3D PRO COLLECTIONS

The innovative 3DPRO collection is exactly what the running, bicycle and motor enthusiasts have been waiting for. Ultralight and thin products ensure the comfort of movement and proper thermoregulation for intensive running or other activities performed.

The name of this collection relates to the special perfected 3D mesh structure of the knitwear used in these products. Its honey-comb texture has been strengthened for better moisture transfer. Modified knit in the areas of excessive perspiration support air circulation inside the structure. This ensures a cooling sensation, which results in enhancing the quality and effect of the physical activity. Moreover, 3DPRO products have special air circulation channels in sweaty zones a fitted design combined with flat seams to prevent irritation or chafing. This collection is made for running, cycling and motorcycle as well as for any other activities performed in high or variable temperatures.
